CLAIMS:

1. An aerosol composition which is prepared from a biliquid foam, an aqueous phase and a propellant.
5
2. An aerosol composition as claimed in claim 1 wherein the biliquid foam incorporates an oil soluble functional material therein.
- 10 3. An aerosol composition as claimed in claim 2 wherein the oil soluble functional material is a fragrance, lubricant, vegetable oil, fuel, silicone, ester or a bioactive material.
- 15 4. An aerosol composition as claimed in claim 1 wherein the propellant is liquefied petroleum gas.
- 20 5. An aerosol composition as claimed in claim 1 which comprises from 0.01 to 40% by weight of the biliquid foam, from 5 to 40% by weight of the propellant and from 20 to 95% by weight of water.
- 25 6. An aerosol composition as claimed in claim 1 wherein the aqueous phase includes therein one or more surfactants.
- 30 7. An aerosol composition as claimed in claim 6 wherein the surfactant is a cationic surfactant or additive.
8. An aerosol composition as claimed in claim 7 wherein the cationic surfactant is a quaternary ammonium compound or an amine oxide.

- 18 -

9. An aerosol composition as claimed in claim 1
which is a polish, air fresher, repellent, pre-
or post shave preparation, shaving preparation or
5 follicle softener.
10. A pressurized aerosol can comprising an aerosol
composition as defined in claim 1.
- 10 11. A process for preparing an aerosol composition as
defined in claim 1 which comprises adding the
aqueous phase to a vessel, adding the biliquid
foam to the vessel and mixing, and filling the
aerosol can with the addition of a suitable
15 propellant.
